LOGIC USED TO RESOLVE UNIQUE APPRAISAL PROBLEMS

PROBLEM(S) INHERENT IN SUBJECT PROPERTY APPRAISAL:

This is a Land Only appraisal, and the Sales Comparison Approach is the only approach utilized to value the subject. The Cost and Income Approaches are eliminated from this report.

This is a 4.87± acre site comprised of 13 parcels and 5 streets being valued as one entity. The parcels are located in Area “Y” and are zoned C2-D within the Monte Vista and Station Sub-Areas of the Downtown Main Street Transit-Oriented Specific Plan. This is located adjacent to the El Monte Metrolink Station. This location is envisioned as a higher-intense, pedestrian oriented mixed-use district with a more urban character.

This report values only the real estate. No Furniture, Fixtures, and Equipment (FF&E), Goodwill, Business Interest, or Going Concern issues are valued.

Under the Sales Comparison Approach, we will utilize similar size and zoned land sales. These sales will be analyzed on a price per square foot of Gross Land Area (G.L.A.).

We assume no responsibility or liability for unknown easements or soil rights, which may or may not adversely impact the utility of the site. For purposes of this report, we assume there are no soil toxicity problems or adverse easements. We have relied on the Assessor's Tax Roll for ownership information.

We saw no evidence of underground storage tanks, active or inactive.
MARKETING TIME

The marketing time is estimated from the marketing period exhibited in local sales, as follows:

</tbody>
</table>

The marketing times found in local sales ranges from 21 to 540 days. Interest rates are below 8.0%.

Commercial land sales are in demand for development of mixed-use projects. Properties close to public transit stops are now being developed with high-density residential units. These sales take longer to close as developers want to get entitlements in place before escrow closes.

We ran a CoStar Analytic report on 31 sales in the El Monte Market. The average marketing time is 4 months.

We estimate the subject's marketing time to be from 120 to 180 days.

Marketing Time:
The time it takes an interest in real property to sell on the market subsequent to the date of an appraisal. Reasonable marketing time is an estimate of the amount of time it might take to sell an interest in real property at its estimated market value during the period immediately after the effective date of the appraisal; the anticipated time required to expose the property to a pool of prospective purchasers and to allow appropriate time for negotiation, the exercise of due diligence, and the consummation of a sale at a price supportable by current market conditions. Marketing time differs from exposure time which is always presumed to precede the effective date of the appraisal. Market value estimates imply that an adequate marketing effort and reasonable time for exposure occurred prior to the effective date of the appraisal. In the case of the disposition value, the time frame allowed for marketing the property rights is somewhat limited, but the marketing effort is orderly and adequate. With liquidation value, the time frame for marketing the property rights is so severely limited that an adequate marketing program cannot be implemented.
**EXPOSURE TIME (USPAP REQUIREMENT):**

Reasonable exposure time is one of a series of conditions in most market value definitions. Exposure time is always presumed to precede the effective date of the appraisal.

*Exposure Time* may be defined as follows:

The estimated length of time the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal; a retrospective estimate based upon an analysis of past events assuming a competitive and open market.

Exposure time is different for various types of real estate and under various market conditions. It is noted that the overall concept of reasonable exposure encompasses not only adequate, sufficient and reasonable time but also adequate, sufficient and reasonable effort. This statement focuses on the time component.

The fact that exposure time is always presumed to occur prior to the effective date of the appraisal is substantiated by related facts in the appraisal process: supply/demand conditions as of the effective date of the appraisal; the use of current cost information; the analysis of historical sales information (sold after exposure and after completion of negotiations between the seller and buyer); and the analysis of future income expectancy estimated from the effective date of the appraisal.

The subject property has an estimated Exposure Time of 30 to 365 days. This is based on the appraised value, with a 75% loan to value available at competitive interest rates and upon discussions with local Brokers, Buyers, and Sellers. Local brokers confirm very short exposure time is required in this market. Small buildings sell quickly.
