AERIAL PHOTO AND ZONING:
DISCUSSION

The property is currently improved with a one-story 1,539 sq. ft. single-family dwelling with an attached 360 square foot garage. The three (3) bedroom, two (2) bath single-family residence was built in 1966. In February 2000, a 330 sq. ft. den addition was constructed 16'-0" from the rear property line. According to the plans submitted by the applicant on March 16, 2020, the proposed 212 sq. ft. addition is in line with the den’s previously approved footprint and will square off the building. The limited depth of the lot, which is 85 feet instead of the typical 100 feet lot depth, deprives the property owner the flexibility of expanding that is available to neighboring properties. The property currently meets front and side setbacks. Further, the site does not have direct access from a public street. The lot is accessible from a common lot that serves four (4) single family residences, including the subject property. The limited accessibility and availability of a full length driveway further creates a unique circumstance that restricts the property from developing the single family residence. The approval of the modification will allow the addition of a fourth bedroom and enhance the livability of the property.

FINDINGS OF FACT

In order to approve the project, the Modification Committee is required to make certain findings. Section 17.20.020 (EMMC) - Necessary conditions outlines the four (4) required findings and conditions to be met in order to approve any Modification:

FINDING:

A. There are exceptional or extraordinary circumstances or conditions applicable to the property involved, or to the intended use of the property, that do not apply generally to the property or class of use in the same zone or vicinity;

FACT:

There are exceptional or extraordinary circumstances or conditions applicable to the property involved due to the accessibility to the subject property and the layout of the existing structures. The subject site is accessible via a shared/common driveway (shared by four (4) units) and does not have direct access to the public street, Killian Street. The limited accessibility and availability of a full length driveway creates a unique circumstance that restricts the property from developing the single family residence. Further, the depth of the lot is 15 feet less than the standard lot and restricts the areas that the existing building can expand into.

FINDING:

B. The granting of such variance will not be materially detrimental to the public health or welfare or injurious to the property or improvements in such zone or vicinity in which the property is located;

FACT:

Granting the Modification will not be detrimental to the public health or welfare or injurious to the properties in the vicinity. The proposed addition is intended to provide an additional bedroom which will allow the property owner to maximize the livability of the property. There will be no impacts to nearby properties such as daylight obstruction, visual blight, etc. The location of the addition at the rear will minimize the impact to surrounding properties. Moreover the property will remain under the maximum Floor Area Ratio (FAR) and lot coverage.

FINDING:

C. Because of special circumstances applicable to subject property, including size, shape, topography, location or surroundings, the strict application of the zoning ordinance is found to deprive subject property of privileges enjoyed by other properties in the vicinity and under the identical zone classifications;
FACT:

Staff has determined that the requested modification can be supported due to existing circumstances of the property including the substandard depth of the lot, which is 85 feet instead of the typical 100 feet lot depth. The single-family dwelling and attached garage were constructed prior to current code requirements. The existing structures are legal non-conforming in that the rear yard setback is currently deficient which thereby deprives the property owner of improvements/expansions to the rear of the property. The proposed project will be consistent with adjacent properties with a similar structural layout.

FINDING:

D. The granting of such variance will not adversely affect the comprehensive general plan.

FACT:

The approval of such modification to reduce the required rear yard setback from 20'-0" to 16'-0" will not adversely affect the comprehensive General Plan. Policy LU-1.1-Code Compliance, ensures land compatibility through adherence to the policies, standards, and regulations in the Municipal Code; Policy LU-1.6-Quality of Life, encourages protecting the quality of life of residents. Allowing the deviation of the required rear setback will allow the construction of the proposed 212 sq. ft. rear addition which will allow an additional bedroom thus enhancing the livability of the property while maintaining the single family residence characteristic of the Low Density Residential designation.

CONDITIONS OF APPROVAL:

1. The project shall strictly conform to the site plan, floor plan and elevation plans on file with the City’s Planning Division and as presented to the Modification Committee on July 14, 2020 and as amended herein.

2. Plans shall comply with all City Department/Divisions regulations and guidelines including Building, Engineering, Planning and the Los Angeles County Fire Department.

3. The approval of Modification No. 09-20 is valid for one (1) year from the date of approval. During this time period, the applicant is responsible for obtaining the required City permit(s) for the proposed project.

4. A copy of the final decision letter with the conditions of approval shall be submitted with the building plans.

5. No future requests for additions shall be permitted including but not limited to shade structures.
6. Rear and front yard setbacks shall have properly maintained landscape areas. The applicant shall provide details and specifications on the Site Plan for all proposed landscaping/planting materials.

7. The rear addition shall be finished with building/finish materials that complement and match the existing residence.

RECOMMENDATION:

Staff recommends that the Modification Committee evaluate the proposal and consider the following Action:

1. Adopt a Categorical Exemption under Section 15301 (Class 1 –Existing Facilities) pursuant to the California Environmental Quality Act and Guidelines, as amended and;

2. Adopt the finding of Facts to approve Modification No. 09-20, subject to the conditions of approval.
